PROFILE

A passionate designer, Maker, & Builder with an interest in pushing the quality of not just digital design, but physical products and spaces as well.

I am keen to push the quality of not just digital design, but physical product design as well. I try to use my technical academic background, experience within startups and volunteer organizations, creativity, and my passion for development and technology to create unique approaches to the design we experience. Design, at its best, can transform lives. I am currently designing and building motorcycles and building Web and Mobile Applications using Flutter for IOS, Android and Web.
